

# Custom Norton Commando Wiring Diagram - Corey Levenson

## COMMENTS

*edited by Grant Tiller December 2020*

- Removed factory points and condenser pack
- Added Pazon Sure-Fire electronic ignition
- Removed factory pair of ignition coils and added 12 volt dual output single tower ignition coil
- Removed factory single phase alternator stator and added three phase Lucas alternator stator
- Removed factory capacitor, zener diode and rectifier and added Shindengen series-type reg/rec

Standard wiring is Positive Earth - that is to say the RED (POSITIVE) wire goes FROM the battery TO the frame
