

Norton Commando 850 MK3 (1975 onwards)

Instrument Console Sub-Harness

Wassell Part Number: WW19161

Lucas Part Number: LU06-5902

Andover Norton Part Number: 06.5902

Note: the wire colours used on the Instrument Console Sub-Harness varies a lot. The colours used here are as per the Norton Commando MK3 Factory Workshop Manual.

However, just as common are the colours that go in to the Main Harness. If you are working on this part of the bike, be very careful with that red linking to the white/brown on the ignition warning light. It is NOT a permanent positive feed / earth and can be the cause of confusion.
